

Quality Policy

Sanem Plastik presents PVC film solutions to the world by combining its experience of more than 25 years in the PVC film industry with its knowledge. The main purpose of our company is to create an ecosystem that will provide the highest added value for our customers and society.

All of our employees are currently working in more than 60 countries with the philosophy of continuous improvement with clear and understandable targets in order to meet the demands of our customers and adapt to the dynamics of the markets.

As Sanem Plastik, our goal is to be a preferred company in every field by using the most up-to-date technology with our happy employees and effective resource management, producing high quality and waste-free production, creating added value for the society with sustainability and innovation studies.

Sanem Plastik management is based on ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 standards in all its working areas. Our basic policy is for the needs and expectations of our customers and all interested parties, with a safe, high quality and innovative service approach;

- To ensure that all processes are established and carried out with a risk-based approach in order to provide fast, safe, solution-oriented, timely and uninterrupted service,
- To ensure the continuity of the service provided by using the resources effectively, efficiently and sustainably,
- To comply with the terms of the contract, the regulations of national and international authorities, legal regulations and mandatory standards,
- To train qualified human resources by producing its own technology, to give importance to environment and employee safety,
- To provide flexible solutions to customer expectations without sacrificing quality at every stage of its activities.
- To take all the health and safety measures that must be taken for the employees to return home safely and to be a constant follower of the work done for this purpose,
- Caring for the environment with 99% recyclable PVC film production,
- To fulfill the requirements by disposing of our wastes through licensed companies,
- To realize energy-saving environmental projects with continuous improvement and Kaizen studies and to proceed with the goal of zero waste,
- Within the scope of the design center, we continue our work with projects that produce less waste, consume less energy, and care about the environment and occupational safety.

In this context, our company undertakes to continuously improve the Integrated Quality Management System at regular intervals every year with new application areas and developing technology.

All of our employees contribute to the successful implementation of this policy with their actions and suggestions.

This policy provides a framework for the regular review of the company's performance and for continuous improvement by monitoring, reviewing, evaluating and advancing the performance criteria defined in the management work against targets.

Yalçın Kutay
